

1 **In the Claims:**

2 No claims have been amended.

3 Claims 51-63 are pending and are listed following:

4

5 **51. (previously twice amended)** A content provider, comprising:

6 a storage system to store content;

7 a server connected to the storage system to serve the content to a local

8 service provider which provides the content to multiple clients;

9 a network port adapted for connection to a first network, the server serving

10 the content via the first network to the local service provider; and

11 a transmitter, responsive to the server, to transmit the content over a second

12 network to the local service provider, the second network providing additional

13 bandwidth so that the transmitter can serve the content to the local service provider

14 in an event that the content is not served via the first network within a designated

15 time period.

16

17 **52. (original)** A content provider as recited in claim 51, wherein:

18 the network port comprises a connector compatible with a wire-based

19 communications network; and

20 the transmitter comprises a transmitter capable of transmitting signals over

21 a wireless medium.

22

23 **53. (previously added)** A content provider as recited in claim 51,

24 wherein the server is further configured to serve the content to the local service

25 provider in response to requests from the multiple clients.

1
2 **54. (previously added)** A content provider as recited in claim 51,
3 wherein the server is further configured to serve the content to at least one other
4 local service provider which provides the content to multiple clients.

5 **55. (previously added)** A content provider as recited in claim 51,
6 wherein:

7 the server is further configured to serve the content to at least one other
8 local service provider which provides the content to multiple clients; and

9 the transmitter is further configured to transmit the content over the second
10 network to the at least one other local service provider.

11
12 **56. (previously added)** A content provider as recited in claim 51,
13 wherein the first network is a high-speed, high-bandwidth network, and wherein
14 the second network is a broadcast satellite network.

15
16 **57. (previously added)** A content provider, comprising:
17 a storage system to store content;
18 a server connected to the storage system to serve the content to a local
19 service provider which provides the content to multiple clients;
20 a high-speed, high-bandwidth network to communicate the content from the
21 server to the local service provider; and
22 a broadcast satellite network to communicate the content from the server to
23 the local service provider.
24
25

1 **58. (previously added)** A content provider as recited in claim 57,
2 wherein the broadcast satellite network includes additional bandwidth to
3 communicate the content from the server to the local service provider.
4

5 **59. (previously added)** A content provider as recited in claim 57,
6 wherein the broadcast satellite network includes additional bandwidth to
7 communicate a portion of the content from the server to the local service provider
8 in an event that the high-speed, high-bandwidth network does not communicate the
9 portion of the content within a designated time period.
10

11 **60. (previously added)** A content provider as recited in claim 57,
12 wherein the server is further configured to serve a first portion of the content to the
13 local service provider via the high-speed, high-bandwidth network, and serve a
14 second portion of the content to the local service provider via the broadcast
15 satellite network.
16

17 **61. (previously added)** A content provider as recited in claim 57,
18 wherein the server is further configured to serve the content to the local service
19 provider in response to requests from the multiple clients.
20

21 **62. (previously added)** A content provider as recited in claim 57,
22 wherein the server is further configured to serve the content to at least one other
23 local service provider which provides the content to multiple clients.
24
25

1 63. **(previously added)** A content provider as recited in claim 57,
2 wherein:

3 the server is further configured to serve the content to at least one other
4 local service provider which provides the content to multiple clients; and

5 the broadcast satellite network is further configured to communicate the
6 content from the server to the at least one other local service provider.
